PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate and Generative AI intern with hands-on experience building Large Language Model (LLM) applications, Retrieval-Augmented Generation (RAG) pipelines, and data-driven solutions. Skilled in Python, machine learning, data analysis, and prompt engineering, with a proven ability to translate business problems into functional AI and data science products. Seeking a Data Scientist / AI Intern role to apply applied ML, GenAI, and AI-agent development skills in a fast-paced, production environment.

CORE TECHNICAL SKILLS

- Programming & Data:** Python, Java, JavaScript, SQL, NumPy, Pandas, Matplotlib
- Machine Learning & AI:** Machine Learning, Deep Learning, TensorFlow, Keras, Model Evaluation, Feature Engineering
- Generative AI / LLMs:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, API Integration
- Data Analysis & Visualization:** Exploratory Data Analysis (EDA), Power BI, Matplotlib, Statistical Analysis
- Web & Backend:** React, Node.js, Supabase, Git, GitHub, REST APIs
- Core CS Foundations:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

EXPERIENCE

Xorstack — Generative AI Software Intern

July 2026 – Present

On-site

- Develop and fine-tune Large Language Model (LLM) applications, including end-to-end Retrieval-Augmented Generation (RAG) pipelines, to power context-aware and accurate AI responses.
- Apply prompt engineering techniques to optimize LLM outputs for reliability, relevance, and performance across production use cases.
- Collaborate cross-functionally with the engineering team to integrate Generative AI capabilities into internal tools and product workflows.
- Apply Python, machine learning, and API integration skills to build and ship AI-driven product features in a real-world software environment.

PROJECTS

AI Chat Bot

- Built an AI-powered chatbot using NLP, LLM, and API integration techniques; applied prompt engineering to improve response quality and relevance.
- Designed an interactive web interface supporting real-time conversations and automated user assistance.

Restaurant Management System

- Built a full-stack system spanning web and mobile platforms covering reservations, menu management, inventory, and order tracking.
- Developed a Node.js backend with a Supabase database and integrated APIs for seamless cross-platform data flow.

Waste Food Management System

- Designed a data-driven web platform connecting food donors with NGOs and shelters using real-time and location-based matching.
- Implemented automated notifications to improve redistribution efficiency and reduce food wastage.

Online Auction Platform

- Built a full-stack auction platform with secure authentication, real-time bidding, and payment integration.
- Implemented responsive UI and backend APIs to support smooth, concurrent auction management.

EDUCATION

M.S. Ramaiah University of Applied Sciences — B.Tech, Computer Science and Engineering

Aug 2023 – 2027

Aggregate: 88.1%

Bhashyam Junior College, Guntur — Class XII, State Board

Jun 2021 – May 2023

Aggregate: 86.2%

LEADERSHIP & EXTRA-CURRICULAR

- Rotaract Club Member
- NSS Team Head
- Student Council Member
