## EDUCATION

---

**M.S. Ramaiah University of Applied Sciences,**  
*Bachelor of Technology, Computer Science and Engineering — Present Percentage: 88.1%*  
**Bhashyam Junior College, Guntur** **June 2021 - May 2023**  
*Class XII (Senior Secondary), State Board — Overall Percentage: 86.2*

*August 2023 - 2027*

## CAREER OBJECTIVE

---

Final-year B.Tech student passionate about AI, data science, software development, and full stack development. Seeking an opportunity in a growth-oriented organization where I can apply my technical skills, work on real-world projects, and continuously improve through hands-on learning and innovation.

## EXPERIENCE

---

### Xorstack—Software Intern (Gen AI)

*July 2026 - Present*

*On-site*

- Working on-site as a generative AI intern, contributing to AI-driven product features and workflows.
- Developing and fine-tuning applications using Large Language Models (LLMs), including building Retrieval-Augmented Generation (RAG) pipelines to power context-aware, accurate AI responses.
- Collaborating with the engineering team on developing and integrating Gen AI capabilities into internal tools/products.
- Applying prompt engineering techniques to optimize LLM outputs for reliability, relevance, and performance.
- Applying skills in Python, machine learning, and API integration in a real-world software development environment.

## PROJECTS

---

### Restaurant Management System

Built a full-stack restaurant management system with both web and mobile applications, covering table/reservation management, menu management, chefs' page, waiters' page, inventory, and order tracking. Developed a Node.js backend with a Supabase database and integrated APIs for a seamless experience across web and mobile platforms.

### Auction Platform

Built a full-stack online auction platform with secure user authentication, product listings, real-time bidding, and payment integration. Implemented responsive UI and backend APIs for smooth auction management and user interaction.

### Waste Food Management System

Designed a web-based platform to connect food donors with NGOs and shelters. Integrated real-time tracking, location-based matching, and automated notifications for efficient food redistribution.

### AI Chat Bot

Created an AI-powered chatbot using modern NLP, LLM, and API integration techniques, applying prompt engineering to shape response quality. Designed an interactive web interface capable of handling real-time conversations and automated responses for user assistance.

## TECHNICAL STRENGTHS

---

**Languages:** Python, Java, JavaScript, HTML, CSS

**AI / LLM Engineering:** LLMs, RAG (Retrieval-Augmented Generation), Prompt Engineering

**Data Analysis:** NumPy, Pandas, Matplotlib, Power BI

**Machine Learning / AI:** TensorFlow, Keras

**Web Development:** React, Git, GitHub

**Backend / Database:** Node.js, Supabase

**Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Computer Networks

## EXTRA-CURRICULAR

---

- Rotaract Club Member
- NSS Team Head
- Student Council Member
